CURRENCY CONVERTER

INTRODUCTION

The Currency Converter is a mobile application designed to provide real-time currency conversion between various international currencies. It ensures seamless, quick, and accurate conversions by fetching up-to-date exchange rates from online sources.

RELEVANCE

Why is this important?

- Increasing globalization requires reliable and efficient currency conversion tools.
- Many existing apps contain ads, lack customization, or require constant internet access.
- Our app addresses these issues by offering a user-friendly, ad-free, and offline-capable solution.

IDEA AND PURPOSE

Main Objectives:

Provide real-time currency conversion with up-to-date exchange rates.

Offer offline mode by caching exchange rates.

Include historical conversion tracking.

Support multi-language UI for accessibility.

Ensure a minimalistic and intuitive user experience.

COMPARISON ANALYSIS

- **Our Advantage:**
- Fully ad-free experience.
- Multi-language support (English, Russian, Kazakh).
- Customizable interface with dark mode and font selection.
